Hand Selected & Donated by:

Alan Kirschenbaum

SCI Life Member &

Kentuckiana Chapter of SCI Board Member

Chapter Member Alan Kirschenbaum has generously donated this spectacular, exhibition-grade Turkish walnut stock and forearm blank. While in Turkey, Alan selected this stunning, well-seasoned wood blank, which is ready to be used immediately, at the ***turkishwalnut.net*** showroom, which is situated in Istanbul. Turkish walnut logs are individually chosen by ***turkishwalnut.net*** experts from old Turkish walnut logs that are a minimum of 200 years old.

Turkish wood experts worked with Alan to specifically select this beautiful burl stock butt while taking care to ensure the strength of the straighter grain wood that encompasses the forearm & pistol grip areas which are suitable for any large caliber break open (side by side/over & under) shotgun or for a double rifle which is frequently used for big game hunting in Africa or any rifle that uses a 2-piece stock such as a Browning auto-loader. Similar stock blanks are priced up to \$1,750.00.
