

***Another Exciting & Unique  
Piece of Jewelry From Our  
Long Time Supporters &  
Friends at Wilderness Mint***

Our friends at **Wilderness Mint** have again donated a beautiful, one-of-a-kind piece of elegant handcrafted jewelry. Up for auction is this beautiful, unique Larimar necklace with accent diamonds set in Sterling Silver.

Larimar Jewelry is made using Larimar (Blue Pectolite) and is only found in a half square mile in the southwestern region of the Dominican Republic. The stone has an extraordinary blue appearance similar to the color of the ocean in tropical areas. The hardness of these unique stones varies from 5 to 7 on the Mohs scale with the darker blue stones ranging closer to 7.

Since 1996, **Wilderness Mint** has enjoyed bringing the sportsman hard to find jewelry items that accentuate their connection with the outdoors. Hunters, fishermen, boaters and other outdoor enthusiasts have little opportunity to purchase truly unique jewelry items that match their lifestyles. **Wilderness Mint** strives to bring you pieces that generally cannot be found in your standard local jewelry store and that will be admired for years to come.

**Wilderness Mint** is broken down into two main divisions, Custom Jewelry and Stock Jewelry, where you can purchase right off this website.

**Value \$700.00**

***Bringing you nature's  
creations in jewelry!***
